PROFILE

Aspiring Java Developer seeking opportunities to contribute to web development projects. Skilled in Java, Spring Boot, and front-end technologies, and eager to learn and grow in software development.

PROJECTS

Hospital Management System
- **Technologies Used:** Java Servlet, JSP, JDBC, MySQL
- **Objective:** Developed a web-based system to manage hospital operations, including patient records, doctor appointments, billing, and inventory management. The system enhances efficiency by streamlining administrative tasks and improving data accessibility.

Expenses Tracker
- **Technologies Used:** Java Servlet, Hibernate
- **Objective:** Developed a web-based expenses tracking system that allows users to record, categorize, and analyze their daily expenses efficiently.

Smart Contact Manager
- **Technologies Used:** Java Spring Boot, Thymeleaf
- **Objective:** Built a web-based contact management system that allows users to securely store, manage, and organize their contacts.

SKILLS

- **Front-end:** HTML, CSS, JavaScript, ReactJS, Bootstrap
- **Back-end:** Java, SpringBoot, Hibernate
- **Database:** MySQL
- **Tools:** Git, GitHub, Postman

EDUCATION

- **BSc-IT**   2022-25
  SPDT College (Mumbai University)   9.3/10 CGPA
